URMIL BHAVSAR

AI Engineer & Full Stack Developer | LLM Workflows, Data Pipelines & Distributed Systems

Ahmedabad, Gujarat, India (Open to Relocate) • +91 7874070280 • urmilwork1@gmail.com • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

AI Engineer & Full Stack Developer with 2.5+ years of experience engineering high-performance web applications, distributed microservices, and AI-powered data solutions using Python, Node.js, NestJS, React, Angular, and PostgreSQL. Experienced in building autonomous AI agents (Text-to-SQL), RAG systems, web extraction pipelines (BeautifulSoup), and automated document screening engines alongside enterprise-scale backend architectures, Kafka transactional outbox messaging, multi-tenant recursive CTE authorization, and Dockerized CI/CD deployments.

TECHNICAL SKILLS

AI & Agentic Systems: AI SQL Agents (Text-to-SQL), LLM Integration (OpenAI, Claude), LangChain, RAG, Prompt Engineering, Speech-to-Text (STT), Sarvam AI (105B Transliteration).

Data Engineering & Extraction: Web Crawling & Scraping (BeautifulSoup), Unstructured Document Parsing, Automated ETL Pipelines, Apache Kafka (Event Streaming), Fact Tables & Data Normalization.

Languages & Frameworks: JavaScript (ES6+), TypeScript, Python, SQL, Node.js, Express.js, NestJS, React.js, Angular.

Databases & Caching: PostgreSQL (Recursive CTEs, Indexing, Performance Tuning), MongoDB, Redis (Throttling & In-memory Caching), Vector Search concepts (ChromaDB / pgvector).

Cloud, DevOps & Architecture: AWS S3, AWS SES, Azure Fundamentals (Blob Storage, ADF), Docker, Jenkins (CI/CD), Microservices, REST APIs, OpenAPI/Swagger, Linux VPS & Nginx.

Integrations & Testing: OAuth 2.0 (HubSpot, Zoho, Salesforce), Razorpay Payment Gateway, WebSockets, Vitest, Jest, Karma.

PROFESSIONAL EXPERIENCE

Techify Solutions Private Limited
Oct 2025 – Oct 2026

Full Stack Developer

Tribhuvandas Foundation — Community Health Platform & AI Transliteration

- Integrated **Sarvam AI (105B) multilingual transliteration models** to phonetically match, clean, and normalize Gujarati and English patient names into relational tables.
- Optimized dashboard, survey, follow-up, and reporting APIs using complex SQL/CTEs, composite indexing, and batched data loading —**reducing response times by ~1s and bringing data-intensive workflows under 800ms**.
- Owned backend delivery for conditional surveys, validation rules, infant/delivery lifecycle automation, village scoping, cardiovascular/diabetes risk analytics, and automated Excel exports.

AiCardVault — B2B SaaS & Multi-Tenant CRM Integrations

- Architected a TypeScript/Express CRM microservice integrating HubSpot, Zoho, and Salesforce; implemented OAuth lifecycles, automated token refresh, bi-directional lead sync, and webhooks with React connection management.
- Engineered Billing & Collections APIs, export routines, role-aware visibility, automated provisioning, and Super Admin organizational hierarchies using **recursive CTE authorization** for strict multi-tenant isolation.
- Delivered Redis-backed login throttling, issue-submission workflows, WhatsApp templates, and optimized React lead tables using DOM virtualization.

Entel — Hospital ICU & Clinical Enterprise Platform

- Delivered ICU ODP, nurse checklists, and configurable physical examination modules across Node.js microservices, BFF aggregations, and API gateway permissions.
- Architected an **event-driven transactional outbox pattern with Apache Kafka** to deliver reliable push notifications, WhatsApp alerts, and OTP flows across 20+ operational events with VVIP patient-name masking.
- Implemented OTP authentication, token revocation, S3-backed consent management, versioned legal document acceptance, structured lifecycle logging across 10+ microservices, and automated Vitest test reports.
- **Cross-Platform DevOps:** Integrated AWS S3 and AWS SES; containerized microservices via Docker and built automated Jenkins CI/CD pipelines across all enterprise projects.

GRT Technologies LLP
Feb 2025 – Oct 2025

Full Stack Developer

Technologies: Angular, React.js, Node.js, Express.js, NestJS, PostgreSQL, VPS

AI SQL Agent — Natural-Language Data Analytics

- Built an AI SQL Agent featuring intelligent conversational chat, speech-to-text (STT), and interactive data visualization, enabling seamless natural-language querying across relational databases.

Symphony RetailAI (SRAI) & POS Analytics (External Consultant)

- Engineered analytics dashboards and dynamic data tables for POS and Symphony RetailAI (SRAI) platforms, improving visibility into retail demand forecasting and assortment optimization workflows.
- Collaborated on integrating data visualization components interacting with retail AI decisioning assistants (CINDE AI) and automated replenishment systems.

Enterprise Web Modernization & Distributed Systems

- Automated REST API service generation from OpenAPI/Swagger specifications for **Apple (LION) client**, accelerating integration cycles.
- Developed high-performance, accessible frontend components for ICICI Bank's modernization program.
- Led API development and payment workflows for Amayra Crystals (Razorpay integration) and billing automation platforms (National Transafe, MedicosWorld, StarVibe).
- Mentored junior engineers on Node.js backend patterns, code reviews, and unit test automation maintaining 80%+ test coverage.

Xceltec Interactive Private Limited
Jun 2024 – Jan 2025

Junior Software Developer

Technologies: Python, Angular, Node.js, Express.js, SQL

Automated Document Parsing & Web Extraction Systems

- **Resume Keyword Parsing & Screening Pipeline:** Developed an automated candidate screening engine that parsed unstructured resumes from batch archives, filtered candidates based on dynamic skill matrices (e.g., React.js, Node.js), dispatched shortlisted profiles to HR via automated SMTP mailing triggers, and implemented automated file-system lifecycle cleanup to delete uploaded ZIP archives post-processing.
- **LinkedIn Web Scraper & Multi-Template Resume Builder:** Built a data extraction tool using **BeautifulSoup** to scrape and parse public profile data into structured JSON entities, rendering formatted candidate resumes across dynamic, multi-template downloadable layouts.
- **P6 (Professional 6 - Risk Lens) — Deal Risk Management & Forecasting:** Maintained and enhanced the backend architecture of the P6 B2B sales deal-risk management and forecasting platform (p6risk.com), optimizing deal review workflows and predictive sales risk tracking across enterprise sales pipelines.
- **MarineCP — Maritime Charter Party Platform:** Led full-stack architecture and API integrations for a maritime contract-drafting portal, integrating Google Maps APIs with strict quota management and billing controls.
- Conducted technical interviews for MEAN stack roles and led structured onboarding programs for new engineering hires.

Reveation Technologies LLP
Feb 2024 – May 2024

MERN Stack Intern

- Developed full-stack e-commerce features including cart management, wishlist state, and checkout payment routes across two client stores.
- Enhanced frontend modules for a jewelry valuation system; contributed to company website redevelopment for higher performance and mobile responsiveness.

INDEPENDENT FULL STACK PROJECTS

Production Web Applications & Custom Admin Platforms
Freelance

- Independently designed, architected, and deployed two full-stack production platforms with custom administrative dashboards for dynamic content and database management.
- Configured Nginx reverse proxy, DNS records, automated SSL certificates via Certbot, and Node.js process management on Hostinger Linux VPS environments.
- **Live Deployments:** Manage Services (manageservices.co.in) and Sunlink Properties (sunlinkproperties.com).

EDUCATION

Bachelor of Engineering in Information Technology
2019 – 2024

Government Engineering College, Modasa
