PROFESSIONAL SUMMARY

Full Stack Developer with 2.5+ years of experience building enterprise and client-facing applications using React, Angular, Node.js, NestJS, and PostgreSQL. Experienced in backend architecture, REST APIs, third-party integrations, and end-to-end application development, from database design through deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL
Frontend: React.js, Angular, Next.js
Backend: Node.js, Express.js, NestJS
Databases: PostgreSQL, MongoDB
Cloud / DevOps: AWS S3, AWS SES, Docker, Jenkins, CI/CD, VPS & DNS Deployment
APIs & Architecture: REST APIs, OpenAPI/Swagger, WebSockets, Apache Kafka, Microservice Architecture, Razorpay Payment Gateway
Testing: Vitest, Karma, Jest
Other: Git, Redis/Caching, Cron Jobs, Agile/Scrum, AI Integration

PROFESSIONAL EXPERIENCE

Techify Solutions Private Limited **Oct 2025 – Present**

Full Stack Developer

Technologies: Node.js, React.js, PostgreSQL, Express.js, Redis, Docker, Jenkins

AiCardVault — B2B SaaS & CRM Integrations

Built a TypeScript/Express CRM microservice for HubSpot, Zoho, and Salesforce, covering OAuth, token refresh, lead sync, webhooks, gateway routes, and React connection management.

Owned Billing & Collections APIs and SQL reports; implemented payment modes, exports, role-aware visibility, automated provisioning, and Super Admin hierarchy with recursive-CTE authorization and tenant isolation.

Delivered issue-submission and WhatsApp template workflows, integration logs/migrations, Redis-backed login throttling, and performance improvements to the React lead table using virtualization.

Entel — Hospital ICU & Clinical Platform

Delivered ICU ODP, nurse checklist, and configurable physical-examination features across Node.js microservices, PostgreSQL migrations, Kafka events, BFF aggregation, and API gateway permissions.

Built Kafka/outbox-based push, WhatsApp, and OTP notifications for 20+ clinical and operational event types, including delivery acknowledgements, scheduled reminders, and VVIP patient-name masking.

Implemented OTP authentication, token revocation, S3-backed consent, and versioned legal-document acceptance; rolled out structured lifecycle logging across 10+ microservices and Kafka consumers, plus Vitest integration tests and HTML reports.

Tribhuvandas Foundation — Community Health Survey Platform

Owned backend delivery for dynamic conditional surveys, visibility rules, infant/delivery lifecycle automation, role-based field-worker access, village scoping, and diabetes/BP risk analytics.

Optimized dashboard, survey, follow-up, and reporting APIs using complex SQL/CTEs, indexes, pagination refactors, batched loads, and caching—reducing response times by roughly 1 second and bringing data-intensive workflows under 800 ms.

Built operational reports and Excel exports with asynchronous generation and email delivery; improved Gujarati/English name search and integrated Sarvam-105B transliteration support.

Cross-project Platform Delivery

Integrated AWS S3 and AWS SES; containerized services with Docker and built Jenkins CI/CD pipelines across AiCardVault, Entel, and Tribhuvandas.

GRT Technologies LLP **Feb 2025 – Oct 2025**

Full Stack Developer

Technologies: Angular, React.js, Node.js, Express.js, NestJS, PostgreSQL, VPS

ICICI Bank — Website Modernization

- Developed responsive, accessible Angular components for ICICI Bank's website modernization initiative.

LION (Apple) — API Integration Automation

- Automated REST API service generation from OpenAPI/Swagger specs for the LION (Apple) client, reducing manual integration work.

HRMS & Amayra Crystals — Backend Development

- Led API development and deployment for HRMS and Amayra Crystals backend systems, from concept to production.
- Integrated Razorpay payment gateway into the Amayra Crystals e-commerce platform, enabling order creation and checkout payment flow.

AI SQL Agent — Natural-Language Data Analytics

- Built an AI SQL Agent with AI-powered chat, speech-to-text, and data visualization features, enabling natural-language database querying.

National Transafe, MedicosWorld & StarVibe — Billing Platforms

- Built backend services, billing workflows, and automated PDF generation across three client platforms (National Transafe, MedicosWorld, StarVibe).

POS & SRAI — Analytics Dashboards

- Built Angular-based analytics dashboards with dynamic tables and advanced filtering for POS & SRAI, improving data workflow visibility.
- Implemented Angular unit tests using Karma as a merge gate, sustaining 80% test coverage across pull requests.
- Mentored junior engineers on React, Angular, and Node.js, supporting cross-team knowledge sharing.

Xceltec Interactive Private Limited — Jun 2024 – Jan 2025

Junior Software Developer

Technologies: Angular, Node.js, Express.js, SQL

MarineCP — Maritime Charter Party Platform

- Independently led architecture, design, frontend and backend development, API integration, and deployment of a maritime charter party platform for owners, charterers, brokers, and admins to trade and draft contracts; integrated the Google Maps API with usage optimization and billing control.

P6 — Business Risk Management System

- Maintained and enhanced a business risk management system, improving reliability and performance while delivering new features.
- Conducted technical interviews for MEAN stack roles and led structured training programs for new hires, ensuring rapid onboarding.

Reveation Technologies LLP — Feb 2024 – May 2024

MERN Stack Intern

Technologies: React.js, Node.js, Express.js, SQL

E-commerce Platforms

- Developed frontend and backend features, including cart, wishlist, and checkout functionality, for two e-commerce platforms.

Jewelry Valuation System

- Enhanced the frontend of a jewelry valuation system for capturing and managing jewelry details.

Company Website Redevelopment

- Led frontend and backend redevelopment of the company website, improving responsiveness and user experience.

OTHER PROJECTS

Scope of Work: Full-stack web applications, custom admin panels, Hostinger VPS deployment

- Independently designed and developed two full-stack production applications with backend APIs and custom admin panels for dynamic content management.
- Managed end-to-end deployment on Hostinger VPS, including frontend, backend, and admin systems.
- Live projects: Manage Services (https://manageservices.co.in) and Sunlink Properties (https://sunlinkproperties.com).

EDUCATION

Bachelor of Engineering in Information Technology

Government Engineering College, Modasa | 2019 – 2024
