PROFESSIONAL SUMMARY

Full Stack Developer with 2.5+ years of experience building enterprise and client-facing applications using React, Angular, Node.js, NestJS, and PostgreSQL. Experienced in backend architecture, REST APIs, third-party integrations, and end-to-end application development, from database design through deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Angular

Backend: Node.js, Express.js, NestJS

Databases: PostgreSQL, MongoDB

Cloud / DevOps: AWS S3, AWS SES, Docker, Jenkins, CI/CD, VPS & DNS Deployment

APIs & Architecture: REST APIs, OpenAPI/Swagger, WebSockets, Apache Kafka, Microservice Architecture

Testing: Vitest, Karma, Jest

Other: Git, Redis/Caching, Cron Jobs, Agile/Scrum, AI Integration

PROFESSIONAL EXPERIENCE

Techify Solutions Private Limited

Oct 2025 – Present

Full Stack Developer

Technologies: Node.js, React.js, PostgreSQL, Express.js, Redis, Docker, Jenkins

- Architected the AiCardVault CRM microservice, integrating HubSpot, Salesforce, and Zoho to unify CRM operations across three platforms with consistent workflow and data synchronization.
- Automated data-seeding for users, roles, permissions, and application configuration in the Billing & Collections module, reducing manual provisioning effort.
- Enhanced Super Admin functionality to manage users across hierarchies, including marketing and finance modules, strengthening multi-department access control.
- Architected manual and scheduled push notification workflows on Apache Kafka for Entel, enabling real-time, event-driven patient engagement.
- Implemented Vitest test cases and automated microservice-level and global HTML test reports, improving release confidence across Entel's microservices.
- Delivered the Tribhuvandas Foundation healthcare survey platform end-to-end as sole backend owner, building dynamic conditional-question workflows, role-based authorization, offline synchronization, and Redis caching.
- Optimized database queries and introduced Redis caching for the Tribhuvandas platform, cutting API response times by roughly 1 second and bringing them under 800ms for data-intensive workflows.
- Integrated Sarvam-105B for multilingual search, expanding platform accessibility for non-English-speaking users.
- Integrated AWS S3 for storage and AWS SES for automated email delivery, reducing manual document and communication handling.
- Containerized services with Docker and built CI/CD pipelines in Jenkins, standardizing and accelerating deployment across AiCardVault, Entel, and the Tribhuvandas platform.

GRT Technologies LLP

Feb 2025 – Oct 2025

Full Stack Developer

Technologies: Angular, React.js, Node.js, Express.js, NestJS, PostgreSQL, VPS

- Developed responsive, accessible Angular components for ICICI Bank's website modernization initiative.
- Automated REST API service generation from OpenAPI/Swagger specs for the LION (Apple) client, reducing manual integration work.

- Led API development and deployment for HRMS and Amayra Crystals backend systems, from concept to production.
- Built an AI SQL Agent with AI-powered chat, speech-to-text, and data visualization features, enabling natural-language database querying.
- Built backend services, billing workflows, and automated PDF generation across three client platforms (National Transafe, MedicosWorld, StarVibe).
- Built Angular-based analytics dashboards with dynamic tables and advanced filtering for POS & SRAI, improving data workflow visibility.
- Implemented Angular unit tests using Karma as a merge gate, sustaining 80% test coverage across pull requests.
- Mentored junior engineers on React, Angular, and Node.js, supporting cross-team knowledge sharing.

Xceltec Interactive Private Limited

Jun 2024 – Jan 2025

Software Developer

Technologies: Angular, Node.js, Express.js, SQL

- MarineCP: Independently led architecture, design, frontend and backend development, API integration, and deployment of a maritime charter party platform for owners, charterers, brokers, and admins to trade and draft contracts; integrated the Google Maps API with usage optimization and billing control.
- P6: Maintained and enhanced a business risk management system, improving reliability and performance while delivering new features.
- Conducted technical interviews for MEAN stack roles and led structured training programs for new hires, ensuring rapid onboarding.

Reveation Technologies LLP

Feb 2024 – May 2024

MERN Stack Intern

Technologies: React.js, Node.js, Express.js, SQL

- Developed frontend and backend features, including cart, wishlist, and checkout functionality, for two e-commerce platforms.
- Enhanced the frontend of a jewelry valuation system for capturing and managing jewelry details.
- Led frontend and backend redevelopment of the company website, improving responsiveness and user experience.

PROJECTS

Freelance Full Stack Development

Technologies: Full-stack web applications, custom admin panels, Hostinger VPS deployment

- Independently designed and developed two full-stack production applications with backend APIs and custom admin panels for dynamic content management.
- Managed end-to-end deployment on Hostinger VPS, including frontend, backend, and admin systems.
- Live projects: Manage Services (manageservices.co.in) and Sunlink Properties (sunlinkproperties.com).

EDUCATION

Bachelor of Engineering in Information Technology

Government Engineering College, Modasa | 2019 – 2024
