PROFESSIONAL SUMMARY

Full Stack & AI Engineer with 2.5+ years of experience engineering enterprise-grade backend architectures, autonomous AI workflows, and intelligent data extraction solutions. Skilled in building natural-language database agents (Text-to-SQL), RAG systems, unstructured document parsers, and web scrapers using Python, Node.js, React, and PostgreSQL. Proven track record in orchestrating microservices, Kafka event streams, and automated ETL pipelines with high-throughput optimizations.

TECHNICAL SKILLS

AI & Agentic Systems: LLM Integration (OpenAI, Claude), LangChain, AI SQL Agents (Text-to-SQL), RAG Systems, Prompt Engineering, Speech-to-Text (STT), Sarvam AI Transliteration.

Data Engineering & Extraction: Web Crawling & Scraping (BeautifulSoup), Unstructured Document Parsing, Automated ETL Pipelines, Apache Kafka, Fact Tables & Data Normalization.

Languages & Frameworks: Python, JavaScript, TypeScript, SQL, Node.js, Express.js, NestJS, React.js, Angular.

Databases & Storage: PostgreSQL (Complex SQL, Recursive CTEs, Indexing), MongoDB, Redis (Caching, Throttling), AWS S3, Vector DB concepts (ChromaDB/pgvector), MySQL.

Architecture, Cloud & DevOps: Microservices, REST APIs, OpenAPI/Swagger, Docker, Jenkins CI/CD, Azure Fundamentals (Blob Storage, Data Factory concepts), Git.

PROFESSIONAL EXPERIENCE

Techify Solutions Private Limited
Oct 2025 – Present

Full Stack & AI Solutions Developer

Tribhuvandas Foundation — Community Health Data Platform & AI Transliteration

- Integrated **Sarvam AI (105B) multilingual transliteration models** to clean, normalize, and match phonetic Gujarati and English patient records into relational fact tables.
- Engineered complex SQL queries and recursive CTEs, optimizing large-scale healthcare data pipelines and reducing reporting API response times from ~1.8s to <800ms.
- Delivered asynchronous background job processors for dynamic health risk analytics, survey condition parsing, and automated Excel/PDF data distribution.

Entel & AiCardVault — Microservices, Event Pipelines & CRM Integration

- Architected **Apache Kafka event-driven pipelines** handling 20+ operational event types across 10+ microservices with guaranteed outbox delivery and structured logging.
- Constructed multi-tenant CRM synchronization microservices (HubSpot, Zoho, Salesforce) managing OAuth lifecycle, automated token refresh, and real-time webhook ingestion.
- Containerized services using **Docker** and established automated **Jenkins CI/CD** pipelines deploying to AWS cloud infrastructure.

GRT Technologies LLP
Feb 2025 – Oct 2025

Full Stack & AI Engineer

AI SQL Agent — Natural-Language Query & Cognitive Data Analytics

- Architected an **AI SQL Agent** enabling non-technical stakeholders to query complex relational databases using natural language prompts and Speech-to-Text (STT).
- Engineered schema parsing, prompt chains, and query safety guardrails to dynamically generate, validate, and execute multi-table SQL queries without manual code intervention.
- Integrated dynamic charting and real-time analytics visualizations in Angular and React, streaming structured data tables directly from backend services.

Enterprise Web Modernization & Distributed Systems

- Automated REST API service generation from OpenAPI/Swagger specifications for Apple (LION) client, accelerating integration cycles.
- Developed high-performance frontend components for ICICI Bank's modernization program with strict accessibility and performance standards.
- Mentored junior engineers on Node.js backend patterns, code reviews, and unit test automation maintaining 80%+ test coverage.

Xceltec Interactive Private Limited
Jun 2024 – Jan 2025

Software Developer (Data Extraction & Automation)

Automated Document Parsing & Web Extraction Systems

- **Resume Keyword Parsing & Screening Pipeline:** Developed an automated candidate screening engine that parsed unstructured resumes from batch archives, filtered candidates based on dynamic skill matrices (e.g., React.js, Node.js), dispatched shortlisted profiles to HR via automated SMTP mailing triggers, and implemented automated file-system lifecycle cleanup to delete uploaded ZIP archives post-processing.
- **LinkedIn Web Scraper & Multi-Template Resume Builder:** Built a data extraction tool using **BeautifulSoup** to scrape and parse public profile data into structured JSON entities, rendering formatted candidate resumes across dynamic, multi-template downloadable layouts.
- **MarineCP Maritime Charter Party Platform:** Led full-stack architecture and API integrations for a maritime contract-drafting portal, integrating Google Maps APIs with strict quota management.

EDUCATION

Bachelor of Engineering in Information Technology
2019 – 2024

Government Engineering College, Modasa
